

How To Make Arms For Gnomes From Dollar Tree Hair Rollers

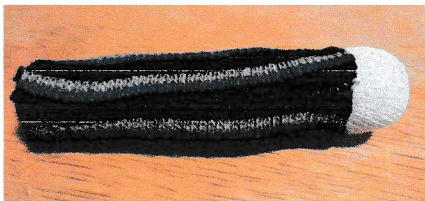

Arms Need To Be Attached **BEFORE**
You Glue On The Hat

1. Cut one end of the curler off to the length you want the arm. Glue a square piece of material (I use a sock) to form the hand,

2. Cut your "arm" fabric long enough and wide enough to wrap around the curler, leaving the hand showing out on the end.

3. Roll and glue the fabric to the hair roller

4. Make sure you glue the fabric to the roller on the open end. This will help give the arm more sturdiness when you glue it to the body.

5. Glue the arms to the back of the gnome behind the knot of the sock, (Hat will cover this)

6. Add your hat. Make sure you glue the back so it covers the where the arms are attached
